FIFRA Section 18 Emergency Exemption Use Directions **FOR DISTRIBUTION AND USE ONLY IN THE STATE OF OREGON**

Transform® WG

For Control of Plant bugs, *Lygus* spp., in Alfalfa Grown for Seed

EPA Emergency Exemption File Symbol 18-OR-XX

This Section 18 Emergency Exemption is effective XX/XX/2018 and expires XX/XX/2018.

Active Ingredient:

sulfoxaflor.....	50%
Other Ingredients	50%
Total	100%

Contains 50% active ingredient on a weight basis.

Keep Out of Reach of Children
DANGER PELIGRO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- These Section 18 Use Directions must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the federal label for Transform WG, EPA Reg. No. 62719-625.
- Any adverse effects resulting from the use of Transform WG under this Section 18 emergency exemption must be immediately reported to the Oregon Department of Agriculture.

Directions for Use: Alfalfa Grown for Seed

Transform WG may be applied to control plant bugs, *Lygus* spp., in a maximum of 7,000 acres of alfalfa grown for seed in Deschutes, Harney, Jefferson, Malheur, Morrow, Umatilla, and Union counties in Oregon.

Application Rate: Apply 1.5 – 2.75 oz. Transform WG (0.047 – 0.086 lb. a.i. sulfoxaflor) per acre, in a minimum of 15 gallons of water per acre, using ground equipment only.

Use a higher rate in the rate range for heavy pest populations.

A maximum of two applications may be made per year, but no more than 5.5 oz. of product (0.172 lb. a.i.) may be applied per acre per year. Two applications per cutting is equivalent to two applications per year.

Application Timing: Treat in accordance with local economic thresholds. Consult your Dow AgroSciences representative, cooperative extension service, certified crop advisor or state agricultural experiment station for any additional local use recommendations for your area.

Environmental Hazards Statement: This product is highly toxic to bees exposed through contact during spraying and while spray droplets are still wet. This product may be toxic to bees exposed to treated foliage for up to 3 hours following application. Toxicity is reduced when spray droplets are dry. Risks to managed and native pollinators from

contact with pesticide spray or residues can be minimized when applications are made before 7:00 a.m. or after 7:00 p.m. local time or when the temperature is below 55 degrees Fahrenheit (°F) at the site of application.

Advisory Pollinator Statement: Notifying known beekeepers within 1 mile of the treatment area 48 hours before the product is applied will allow them to take additional steps to protect their bees. Also, limiting application to times when managed bees and native pollinators are least active at the site of application will minimize risk to bees. Avoid applications when environmental conditions (e.g. dew, fog or precipitation) may prolong the drying time of spray residues.

Spray Drift Management: To minimize spray drift and potential exposure to bees when foraging on plants adjacent to treated fields, applications are prohibited when wind speeds are above 10 miles per hour (mph).

Restrictions:

- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the federal label for Transform WG (EPA Reg. No. 62719-625).
- These emergency exemption use directions must be in the possession of the user at the time of application.
- Do not enter or allow worker entry during the restricted entry interval (REI) of 24 hours.
- Do not make applications less than 7 days apart.
- Do not make more than two applications per crop. Two applications per cutting is equivalent to two applications per year.
- Do not apply more than a total of 5.5 oz. of Transform WG (0.172 lb. a.i. sulfoxaflor) per acre per year.
- Do not apply within 7 days of harvest.
- Do not apply this product by aerial application or through any type of irrigation system.
- Apply at night, after sunset and four hours before sunrise, when bees are not actively foraging in alfalfa grown for seed. Do not apply between four hours before sunrise and sunset.
- Any adverse effects resulting from the use of Transform WG under this Section 18 emergency exemption must be immediately reported to the Oregon Department of Agriculture.

Special Crop Use Restrictions

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a non-feed/non-food use by the Oregon Department of Agriculture, and is regulated by the Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use On Crops Grown For Seed. If the applicator of this pesticide is not the producer, the applicator must provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, must provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed may be used or distributed for food or feed for 1 year (365 days) after the last application of this product. This restriction pertains to, but is not limited to, green chop, forage, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed screenings shall be disposed of in such a manner that screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement:

"This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, the Oregon Department of Agriculture and other regulatory agencies."
